**GEOCHEMICAL AND ISOTOPIC CHARACTERIZATION OF VOLCANIC
PRODUCTS FROM EL HIERRO ISLAND**

The Istituto Nazionale di Geofisica e Vulcanologia (hereafter INGV) is the Italian institution responsible for geophysical and volcanological monitoring of volcanoes in Italy and devoted to study, among the others, the evolution and structure of the magmatic systems feeding active and non-active volcanoes worldwide. The Universidad de Las Palmas de Gran Canaria (hereafter ULPGC) offers a wide range of degrees in all the major fields of knowledge. Moreover, in the framework of the Spanish research project "Geochronology and petrogenesis of the Holocene volcanism of El Hierro, Canary Islands (Acronym: LAJIAL) (PGC2018-101027-B-I00)" funded by the Spanish Ministry of Science and Innovation (State R&D Program Oriented to the Challenges of the Society), Prof. FRANCISCO JOSÉ PÉREZ TORRADO, as head researcher of the project and the research team involved are deepening the knowledge of the Holocene subaerial volcanism of El Hierro, key to understand the volcanic activity of the Canary Islands as a whole and to prevent the impact of future eruptions on its westernmost island.

The INGV, represented by his President, Prof. CARLO DOGLIONI

and

UNIVERSIDAD DE LAS PALMAS DE GRAN CANARIA, represented by the head of the LAJIAL project, Prof. FRANCISCO JOSÉ PÉREZ TORRADO,

Both of them hereafter referred to as the Parties;

WHEREAS, the Parties are mutually interested in cooperation for the development of the research activities related to:
